SKILLS

Programming Languages	JavaScript, TypeScript, SQL, Python
Front-end Development	HTML, CSS, React.js, Next.js, Tailwindcss, Redux Toolkit, ShadCn, Zustand, SaSS, ZOD, React-Hook-Form
Backend Development	Node.js, Express.js, Supabase, Firebase, Clerk, Arcjet, GraphQL, RestAPI
Mobile Development	Flutter, React Native, Expo
Real-Time	SocketIo, WebRTC
AI & Architecture	LangGraph, LangChain, BeautifulSoup, Remotion
Databases	MongoDB, PostgreSQL, MySQL, Mongoose, Prisma, NeonDB, SQLite
Tools and Technologies	Git, GitHub, Vercel, Netlify, Render, Cloudinary, ImageKit, Sevala, Google Cloud Platform (GCP), Google Play Console

EXPERIENCE

Software Developer | Ennapd

Jul 2025 - Present

- Developed a reusable **white-label** mobile app template using React Native and Expo. Wrote custom Node.js scripts to automatically generate and style new client apps from a single master codebase, cutting down manual setup time significantly.
- Developed and launched the **Pixnary** mobile app using Flutter. Built it to work 100% offline using Isar database and integrated local, on-device AI models so user data stays completely private.
- Contributed to a collaborative **goal-tracking app** by engineering an AI assistant that monitors user progress and sends context-aware nudges. Implemented a custom scoring system to gamify the experience and increase user engagement.
- Engineered a fully automated video generation pipeline using **Python and LangGraph**. Connected it to a React and Remotion frontend to programmatically turn scraped web data into rendered educational videos.
- Developed and maintained full-stack web features using Next.js, bridging frontend interfaces with backend services to support seamless cross-platform functionality.
- Managed the end-to-end release cycle of **3+** production apps on the **Google Play Console**, handling everything from internal testing to public rollouts, while administering backend infrastructure using Firebase and Google Cloud.

Intern | E-Tech

Jul 2024 - Dec 2024

- Worked on a full functional Book ecommerce website **CODEBOOK** and boosted user engagement by **37%** by building responsive and cross-device functional website design.
- Worked on **CineMate** a netflix clone where worked on state management and efficient fetching of data from REST APIs and creating REST APIs using express and typescript with mongodb as database.

PROJECTS

Chatify

[LiveDemo](#) [GitHub](#)

- Engineered a low-latency chat application utilizing **Socket.io** and the **MERN** stack for instantaneous bi-directional communication. Secured the backend with **JWT** authentication and **Arcjet** rate limiting, while utilizing **Resend** for automated transactional emails.

Dine Dash

[LiveDemo](#) [GitHub](#)

- Developed a production-grade web platform featuring dedicated admin and user interfaces for restaurant and menu management utilizing **React**, **Express.js**, and **TypeScript**. Integrated **Stripe** webhooks for secure payment processing and implemented **Zustand** for complex order state tracking.

EDUCATION

Bachelor of Technology in Computer Science, **Chouksey Engineering College**

2021 - 2025
